Indicates 1.5" bleed Indicates edge of skin Indicates 1.5" focus area

Will be applied to frame like this

NOTE: ALL SET UP INSTRUCTIONS APPLY TO THE 4X3 US SKIN SIZES AS WELL

File Setup

FOR GENERAL FILE SETUP CONSULT THE FULL FILE PREP GUIDELINE AT: http://xpressions-snap.com/guidelines.htm

For all XSnap skins we require 1.5" of bleed OVERALL (.75" on all sides). If bleed is not provided to us we will do our best to add/clone your artwork when applicable. If not, we will need to bleed out your image to ensure we have enough for print/finishing. See example below:

Artwork provided w/out bleed

Image bled out for print size

Finished Size

X-Factor

Due to the nature of the Xpressions® Salesmate[™] graphics, we recommend keeping all artwork elements you do not want severely distorted (ie text, logos, or faces) 3-5" in on all sides, however due to the small size of the Salesmate[™] skins this leaves little room for design. We find that 1.5" in on all sides creates an acceptable amount of stretch while still allowing plenty of space for your design. EXAMPLES OF STRETCH AT DIFFERENT SIZES SHOWN BELOW:

PLEASE NOTE IF DISTORTION IS INTENDED AS PART OF DESIGN
